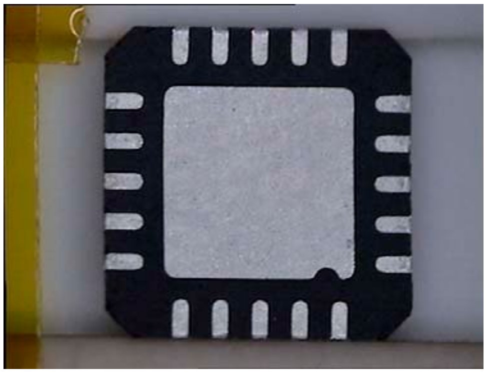
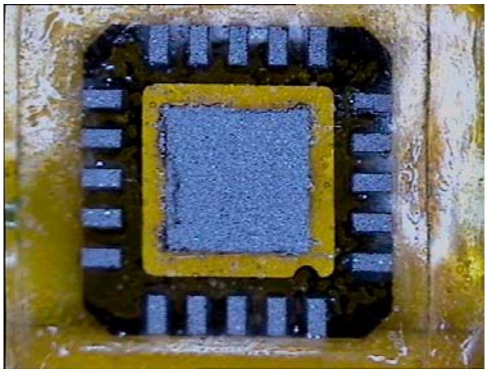
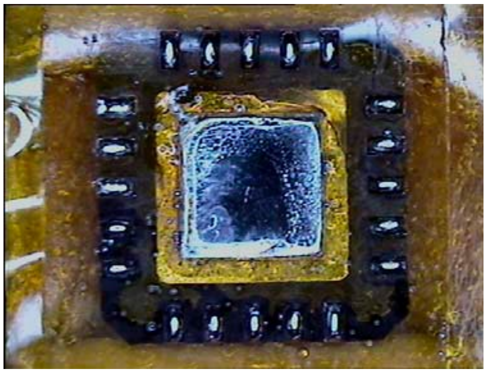
STENCILMATE™ USER INSTRUCTIONS



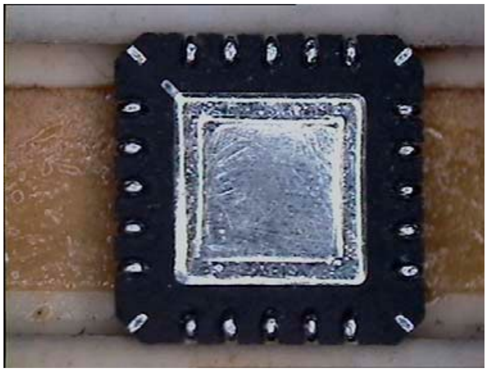
STEP 1
Remove device from PCB.
Wick or scavenge and clean part.



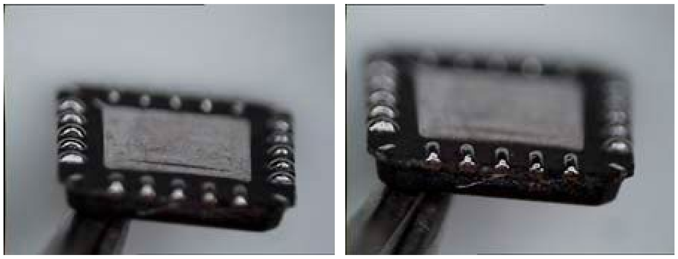
STEP 2
Place the part StencilMate ™ aligning it with part lands and applying pressure to the stencil. Squeegee solder paste with a manual squeegee into the apertures. Clean off surface of stencil.



STEP 3
Reflow paste based on solder manufacturer's profile.



STEP 4
Remove StencillMate™ from device clean and inspect.



STEP 5
Inspect to make sure the "bumps" are uniform and consistent on all of the pads.
